

Release Notes

Pylon Conduit and Pylon Pro

Version 5.3
February 2005

About this document

This document covers information about installing and syncing Pylon Conduit, Version 5.3 and Pylon Pro, Version 5.3 that other published documentation does not cover.

This document describes:

- Pylon Conduit and Pylon Pro for Palm OS
- Pylon Conduit and Pylon Pro for Pocket PC OS

What's new in this release

Pylon Conduit and Pylon Pro, Version 5.3 includes the following enhancements.

Documentation

To download documentation for this release, visit the Pylon Conduit & Pro Product Manuals page:

http://www.iAnywhere.com/developer/product_manuals/pylon_conduit_pro.

Available Documentation:

- *Release Notes for Pylon Conduit and Pylon Pro, Version 5.3*
Provides critical upgrade and installation information on Palm and Pocket PC. Also provides information on late-breaking issues for the current release that are not covered in the 5.0 documentation.
- *Desktop User Guide for Pylon Conduit and Pylon Pro, Version 5.3*
Provides instructions for configuring and using Pylon Conduit and Pylon Pro on Palm and Pocket PC.

Bug fixes

The following section describes bug fixes in Pylon Conduit and Pylon Pro.

Support for Lotus Notes ACL Groups to any valid depth

If group A is included in group B, and group B is granted access to a Lotus Notes feature, members of group A are now able to access that Lotus Notes feature in Pylon without also being members of group B.

Pylon Pro automatically syncs most current form design information to device when in "synchronize the files" mode

When a user makes changes in database that was previously synced, both the database changes and the new records based on them are uploaded smoothly to Lotus Notes on the next sync.

"Desktop Overwrites Handheld" respects filter settings for date

When a conduit's syncs action is set to "Desktop overwrites Handheld," any filter setting, such as "Modified since last sync," is now fully respected in the sync.

New and modified records always sort correctly in Pylon Pro

When a user modifies records and then sorts the display on a different column, the new and modified records are always sorted into the correct location, instead of sometimes appearing incorrectly at the bottom of the list.

Notes Address Book's new contact names format preference setting is now supported when contacts are created on device and synced back to Notes

If the user changes the name formatting in the Notes address book to Last Name, First Name, then adds an entry on the device, that entry syncs correctly back to the desktop.

Known issues

The following section describes known issues in Pylon Conduit and Pylon Pro.

Location in Calendar is not supported on Tungsten T or E

On Tungsten T or E, the value entered for Location in a Calendar entry on the device is not synced to Notes.

Repeating and Alarm in Tasks are not supported in Palm OS 5.2.x

On Palm OS 5.2.x, a value entered in a Task entry on the device for Repeating or for Alarm is not synced to Notes.

Uninstalling Pylon Pro from device leaves icon in Start|Programs

When Pylon Pro is uninstalled from a mobile device, the program icon is not removed from the device's Start|Programs menu. Tapping the icon results in a "Cannot find program" error.

Palm 5-way navigation wheel not supported

The Palm 5-way navigation wheel is not supported by any of the Pylon conduits.

Sync fails if you install without license key, then edit valid key into notes.ini

If you choose not to enter a license key, the Pylon installer displays a popup stating that you can enter the license key into either the *notes.ini* file or the Pylon Configuration database before attempting to sync. Entering the license key into the Pylon Configuration database does allow you to sync, but if you enter the license key into the *notes.ini* file, the sync fails.

Contacting iAnywhere

- Contact technical support at corp_support@ianywhere.com; services will be provided in accordance with your support agreement.
- Submit a question about your Pylon license directly at http://www.ianywhere.com/support/pylon/license_questions.html
- Access documentation from http://www.ianywhere.com/developer/product_manuals/pylon_conduit_pro/index.html.
- Access product technotes from http://www.ianywhere.com/support/pylon_condpro.html.
